COLLECTION

1 ton of cork
produced

Up to 73 tons of CO₂
sequestered by the
cork oak forest

Cork, shaping the future through sustainability

Cork comes from the bark of the cork oak tree (*Quercus Suber L.*). It is a 100% natural plant tissue, which covers the trunk and branches.

One cubic centimeter of cork contains about 40 million cells. Cork is known as “nature’s foam” due to its alveolar structure.

Cork is sustainably harvested by specialized professionals without damaging the trunk. The cork oak tree re-grows the outer bark layer and is harvested once every 9 years over the course of its lifetime, which is about 200 years. Cork is a natural material which is both renewable and recyclable.

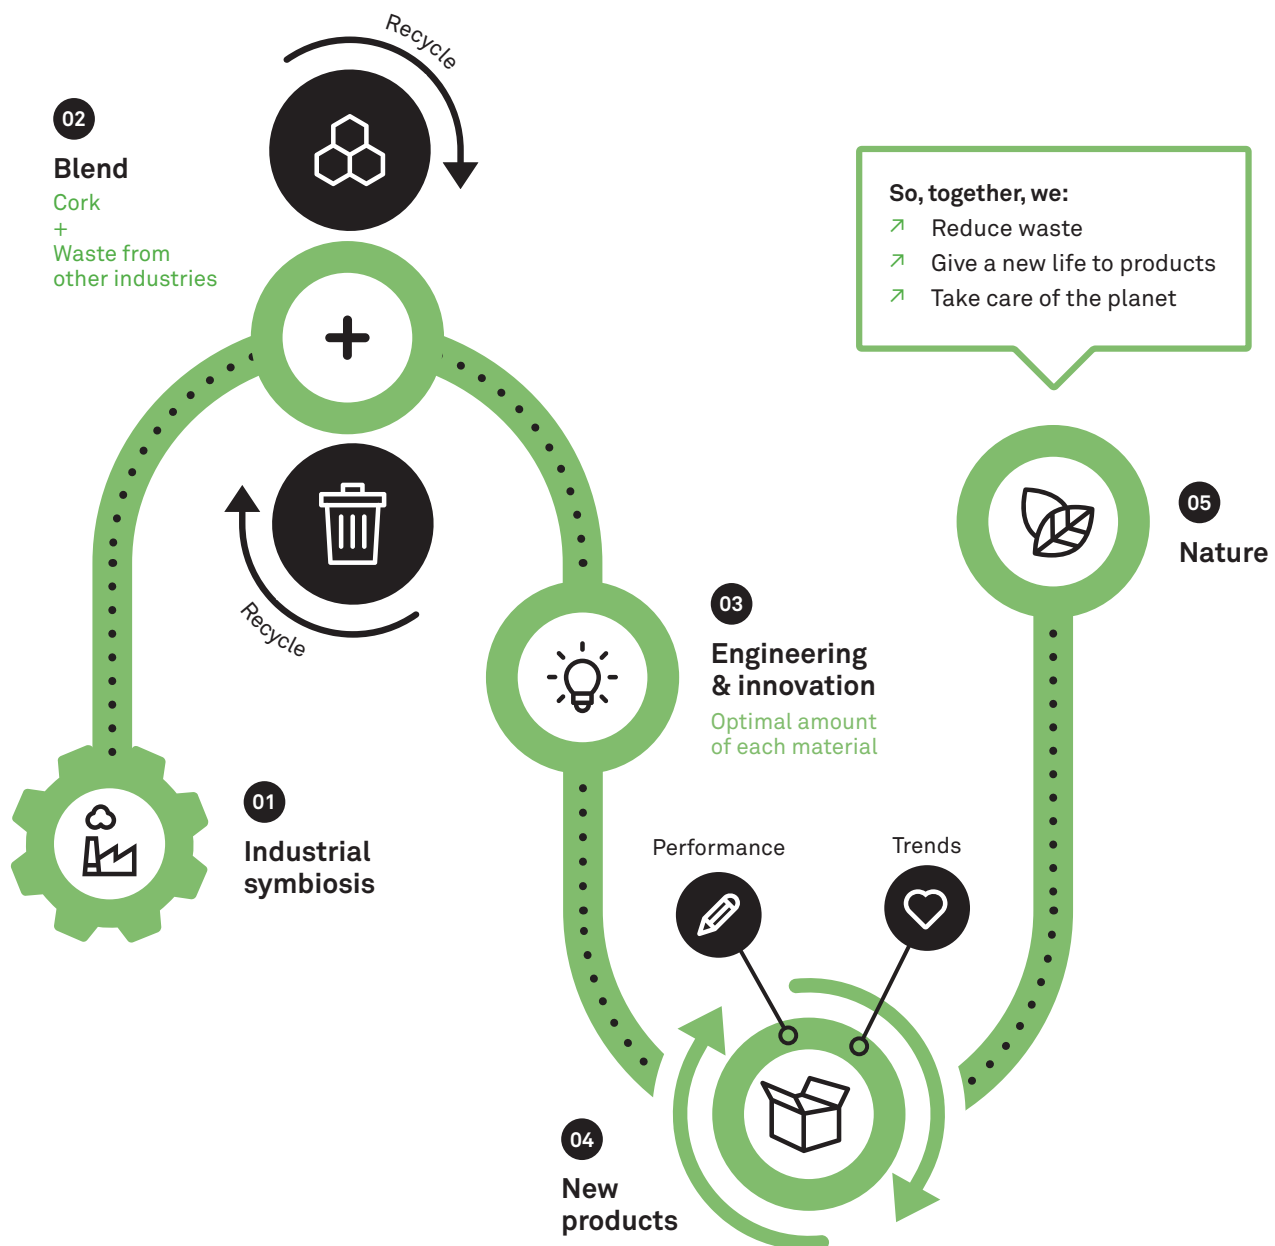

We have always been circular.

Amorim Cork Composites - a Corticeira Amorim company - was founded in 1963 to add value to cork not used in the cork stoppers industry and to cork stoppers at the end of their life.

Since then, in the framework of our innovation culture, we have discovered and identified other materials from other industries (industrial symbiosis) to blend with cork and leverage its attributes.

For this purpose, we use different materials from the footwear, automotive and packaging industries. We give a new life to materials that otherwise would be wasted.

Yoga collection

A conscious cork-based yoga collection that aims to convey mindfulness and profound respect for nature.

Holistic practices can have a major positive influence on our lives. We aim to commercialize mindful essentials, i.e. items that we consider to be essential for everyday life, and believe that this includes the most essential Yoga tools. We focus on offering a selected range of essentials - that are beautiful, useful and highly respectful of nature.

CORK YOGA BLOCK

	1,0mm cork + 3mm EPDM rubber		

Cork - One of Nature's most extraordinary materials

For each ton of produced, the cork oak forest can sequester up to 73 tons of CO₂* and thus makes a positive contribution to climate regulation, by helping reduce the carbon footprint of the products in which it is used.

In addition, cork also brings numerous characteristics to its products, as mentioned below:

MAIN CHARACTERISTICS

Anti-slip

Natural and recyclable

Sweat-resistant

Sustainable

Soft and warm touch
