HIGH PERFORMANCE FINAL FLOORING

SPORTSFLOOR is the effective solution for all sport surfaces.

The **SPORTSFLOOR** products are manufactured through the combination of different elastomer to achieve a unique level of flexibility, resistance to usage and impact absorption.

All these properties make **SPORTSFLOOR** the right choice for flooring surfaces requiring high levels of resilience optimizing at the same time the comfort levels during sports practice or leisure activities.

The floor surface that meets every need.

The advantages of installing a SPORTSFLOOR.

This innovative material, with a flexible and unique surface finish, is ideal for integrating into a broad variety of projects due to its unparalleled characteristics:

- **Anti-slip.**
- **Easy installation and maintenance.**
- **Resistant to scratches and indentations.**
- **Long and extended life-cycle.**
- **High durability.**
- **Impact absorber.**

SPORTSFLOOR, a versatile surface.

REINVENTING SUSTAINABILITY FOR THE FUTURE

The Sportsfloor surface is made out of high quality recycled rubber sourced from used tyres and waste rubber.

Sustainability

Our brand incorporates the sheer quality of the final recycled rubber floor surface. We convert used tyres and other waste rubber into recycled rubber of such high quality that it may be recycled at the end of the product life-cycle. Hence, we contribute towards reducing our environmental impact and thereby help in ensuring environment sustainability.

Our products are not only recyclable but also in compliance with both indoor air quality and low Volatile Organic Compounds (VOCs) emission requirements.

Applications

Leisure and others

- Libraries
- Study rooms
- Storage areas
- Bathrooms and restrooms
- Foyers / Waiting rooms
- Conference rooms
- Machine rooms
- Access areas, ramps and stairways
- Walkways, paths and running tracks

Sporting

- Fitness Centres
- Gymnasiums
- Ice rinks
- Training areas
- Access ramps
- Pathways and running tracks
