Expect the unexpected
Alma Gémea, a love story.

Alma Gémea combines cork and ceramics - two noble materials, both of which have a long tradition in Portugal. The use and combination of these materials, in an innovative and differentiating manner, naturally brings us to the most sophisticated dimension of contemporary home design. Alma Gémea is a forward-looking product that pays heed to the roots of its cultural heritage.
Love found in an unexpected place.

Distinctive and timeless, the Alma Gémea collection is based on principles such as forging a natural symbiosis between two elements and the surprise factor resulting from the unexpected combination of such materials with unprecedented lines, contours and functionalities.

Alma Gémea is much more than a love story. It is a relationship that is improbable and yet perfect. An experience that elevates the human senses to the universes of complementarity and union. Through our combined desire, we have discovered points of connection in our differences - that form a unique and beautiful whole. Opposites attract. The warmth of cork and the coldness of ceramics blend together. Love is born.

Alma Gémea could have been a love story between two different people, who despite theirs differences find both common and complementary characteristics, which build a stronger “one”.

In Love with Nature.

Amorim Cork Composites and Matceramica are leading companies in Portugal and abroad in their respective areas. They have joined forces to create a project that will distinguish and differentiate them and enable them to generate value together. This sharing of knowledge and experience has not only delivered a new product line but has also given birth to innovative processes that will define the future of the combination of the respective raw materials.

Amorim Cork Composites

Amorim Cork Composites is a world leader in cork composite materials with a long track record of achievements using cork in demanding industries such as construction, flooring, sport surfaces, aerospace, automotive, panels and composites, power industry, seals and gaskets, consumer goods, furnishing, footwear.

We recycle, reuse and reinvent entirely natural and organic materials. Innovation is our driving force.

The benefits of using cork composites go beyond aesthetic considerations and include questions of functionality and advantages in the manufacturing process.

Matceramica

Matceramica started in 2000 is currently the largest earthenware in Portugal, and one of the biggest producers of tableware in Europe. Located near Fátima, in the center of Portugal, covers a total area of 25000m².

Its core activity is the production of tableware but also ovenware and decorative items, using its own bodies – either earthenware or stoneware – and also in its own glazes.

Matceramica exports the total of its production to Europe and to the U.S.S., with the presence in most of the well-known retail chains and brands. Constantly on the leading edge of market trends, Matceramica is ever more recognized as a synonym of design and quality, focusing in their service and oriented to client satisfaction.
