Cork comes from the bark of the cork oak tree (Quercus Suber L). It is a plant tissue, 100% natural, which covers the trunk and branches.

One cubic centimeter of cork contains about 40 million cells. Cork is known as “nature’s foam” due to its alveolar structure.

Cork is sustainably harvested by specialized professionals without damaging the trunk. The cork oak tree re-grows the outer bark layer and is harvested every 9 years. Over the course of its lifetime, which lasts about 200 years, Cork is a natural material which is both renewable and recyclable.
Amorim Cork Composites - a Corticeira Amorim company - was founded in 1963 to add value to cork not used in the cork stoppers industry and to cork stoppers at the end of their life.

Since then, in the framework of our innovation culture, we have discovered and identified other materials from other industries (industrial symbiosis) to blend with cork and leverage its attributes.

For this purpose, we use different materials from the footwear, automotive and packaging industries. We give a new life to materials that otherwise would be wasted.

So, together, we:
- Reduce waste
- Give a new life to products
- Take care of the planet

We have always been circular.
Memo boards made of cork and other materials for pinning notes, messages, photographs or documents.

Remember that important date, leave someone a note, or hang up the best photo from your last holiday... a memo board can be the solution.

Versatile, and easy to install, memo boards allow you to pin any number of materials to them without damaging your walls, and are very useful at home, but also in offices, businesses, and schools.

Discover our wide range of cork memo boards. Lightweight and practical, they are a must for any home or office.
