

HOME RANGE

↗ Cork, shapping the future through sustainability

Cork comes from the bark of the cork oak tree (*Quercus Suber L.*). It is a plant tissue, 100% natural, which covers the trunk and branches.

One cubic centimeter of cork contains about 40 million cells. Cork is known as “nature’s foam” due to its alveolar structure.

Cork is sustainably harvested by specialized professionals without damaging the trunk. The cork oak tree re-grows the outer bark layer and is harvested once ever 9 years over the course of its lifetime, which is about 200 years. Cork is a natural material which is both renewable and recyclable.

We have always been circular.

Amorim Cork Composites - a Corticeira Amorim company - was founded in 1963 to add value to cork not used in the cork stoppers industry and to cork stoppers at the end of their life.

Since then, in the framework of our innovation culture, we have discovered and identified other materials from other industries (industrial symbiosis) to blend with cork and leverage its attributes.

For this purpose, we use different materials from the footwear, automotive and packaging industries. We give a new life to materials that otherwise would be wasted.

Home range

Original and durable, enjoy the aesthetics and versatility of different cork products for the home and kitchen.

You can use them simply as decorative objects or explore the more practical and useful side of our different products. By your side as you cook or enjoy a meal with family or friends, our products can bring more life to everyday experiences.

Protect your table with cork coasters, trivets, trays and placemats. Insulator, lightweight and waterproof, they can be used with all types of accessories at home. The natural, neutral colour of cork will blend easily with the rest of your table decorations.

Our range includes different solutions of various shapes, thicknesses and dimensions.

The **Cork Inside** seal guarantees that this product contains, in its cork formulation, a 100% natural and recyclable material with unique technical properties.

Cork Inside formulations combine cork with other materials and are developed and rigorously tested by Amorim Cork Composites' innovation and engineering teams. **Cork Inside** responds to stringent requirements and guarantees the performance required for its application.
